Amendments to the Claims:

- (Currently Amended) A liquid food product containing particles of dehydrated lactic acid bacteria coated with at least one vegetable fat that is solid at ambient temperature, eharacterized-in-that wherein said coated bacteria are in the form of granules having an average size of between 95 and 300 µm containing lactic acid bacteria in an amount greater than or equal to 1×10¹⁰ CFU per gram of granules, in that said granules are free of starch, and in that said food product has a pH of less than or equal to 4.5 and a water content by weight of at least 83%.
- (Currently Amended) The food product as claimed in claim 1, eharacterized in
 that wherein the average size of the granules of lactic acid bacteria particles is less than 200 μm.
- (Currently Amended) The food product as claimed in claim 1 or 2, characterized in that wherein the average size of the granules of lactic acid bacteria particles is between 150 and 200 μm.
- (Currently Amended) The food product as claimed in <u>claim 1</u> any one of the
 preceding claims, characterized in that <u>wherein</u> it is in the form of a fermented milk or of a
 beverage.
- (Currently Amended) The food product as claimed in claim 4, eharacterized in
 that wherein the beverage is a fruit juice, a mixture of milk and of fruit juice or a vegetable juice.
- (Currently Amended) The food product as claimed in <u>claim 1</u> any one of the
 preceding claims, characterized in that <u>wherein</u> the lactic acid bacteria are chosen from
 lactobacilli and bifidobacteria.
- (Currently Amended) The food product as claimed in claim 6, eharaeterized in
 that wherein the lactic acid bacteria are chosen from Lactobacillus casei, Lactobacillus
 plantarum, Bifidobacterium animalis and Bifidobacterium breve.

- (Currently Amended) The food product as claimed in claim 7, eharaeterized in that wherein the lactic acid bacterium is a Lactobacillus casei I-1518.
- (Currently Amended) A food product as claimed in <u>claim 1</u> any one of the
 preceding claims, characterized in that <u>wherein</u> the lactic acid bacteria are dehydrated by
 lyophilization prior to them being granulated.
- (Currently Amended) The food product as claimed in claim 9, eharacterized in that wherein the bacteria are treated with a lyoprotectant prior to them being lyophilized.
- (Currently Amended) The food product as claimed in <u>claim 1</u> any one of the
 preceding claims, characterized in that <u>wherein</u> the particles of dehydrated bacteria have an
 average size of between 80 and 150 µm.
- 12. (Currently Amended) The food product as claimed in <u>claim 1</u> any-one of the <u>preceding claims</u>, <u>characterized in that wherein</u> the particles of dehydrated bacteria have a water activity of less than 0.25.
- 13. (Currently Amended) The food product as claimed in <u>claim 1</u> any-one of the preceding claims, characterized in that <u>wherein</u> the vegetable fats used for coating the particles of dehydrated bacteria are chosen from hydrogenated and nonhydrogenated, fractionated or unfractionated, esterified or nonesterified substances, food waxes, fatty acids, and mixtures thereof.
- 14. (Currently Amended) The food product as claimed in claim 13, eharaeterized in that wherein the vegetable fats are chosen from palm stearic oil with a melting point (Mp) = 35°C, palm oils with an Mp of 45°C and 58°C, cocoa butter, peanut butter, palm kernel oil, hydrogenated coconut oil with an Mp = 32°C, carnauba wax with an Mp = 80-85°C, microcrystalline wax of petroleum origin, stearic acid, palmitic acid, and mixtures thereof.

- (Currently Amended) The food product as claimed in claim 14, eharacterized in
 that wherein the vegetable fats used for coating the particles of dehydrated bacteria are chosen
 from those which have a melting point above 40°C.
- 16. (Currently Amended) The food product as claimed in claim 1 any one of the preceding claims, characterized in that wherein the concentration of dehydrated lactic acid bacteria in the granules is greater than or equal to 1×10¹⁰ CFU per gram of granules, and a maximum of 5×10¹¹ CFU per gram of granules.
- (Currently Amended) The food product as claimed in <u>claim 1</u> any one of the preceding claims, characterized in that <u>wherein</u> said granules have a water activity of less than 0.4.
- 18. (Currently Amended) The food product as claimed in claim 1 any one of the preceding claims, characterized in that wherein the fat(s) represent(s) from 40% to 75% by weight relative to the total weight of the granules.
- 19. (Currently Amended) The food product as claimed in <u>claim 1</u> any one of the preceding claims, characterized in that <u>wherein</u> the concentration of coated lactic acid bacteria is between 5×10⁶ and 5×10⁹ CFU per gram of finished product.
- (Currently Amended) The food product as claimed in claim 1 any one of the
 preceding claims, characterized in that it wherein the food product contains at least 90% of
 water.
- 21. (Currently Amended) The food product as claimed in <u>claim 1</u> any-one-of the preceding claims, characterized in that <u>wherein</u> the amount of granules of dehydrated lactic acid bacteria particles is less than 2% by weight relative to the total weight of finished product.

22. (Currently Amended) The food product as claimed in claim 21, eharaeterized in that wherein the amount of granules of dehydrated lactic acid bacteria particles is between 0.01% and 1% by weight relative to the total weight of finished product.
